Through time, Art & Philosophy have both served as channels for expression of the intangible and the sublime. While the artist weaves a piece of art with imagination and creativity, he brings into form the transcendental wisdom from the invisible into the visible. Thus Art in its true essence, deeply intertwines with philosophy to manifest the virtues of beauty, harmony and unity reminding us to be the artist of our own life. Thereby inspiring transformation of consciousness and heralding the Renaissance of human life.

Join us for practical presentations, live performance and a panel discussion followed by a Dialogue with the audience, with professionals and artists representing different forms of Art as they share their inspiring journey on the path to wisdom through the medium of Art and Practical Philosophy.
